Procedures

HBO

Hyperbaric treatment #27 was completed today for Diabetic wound(s) of the lower extremities. Pre-Treatment Vital Signs were: Time Vitals Taken: 12:18, Blood Pressure: 118/86 mmHg, Pulse: 84 bpm, Respiratory Rate: 18 breaths/min, Temperature: 97.9 °F, Capillary Blood Glucose: 219 mg/dl. Patient reports a pain level of 0. The treatment protocol provided was 2.0 ATA x 90 minutes w/ 100% oxygen and no air breaks. The dive rate down was 1.0 psi / minute. The dive rate up was 1.0 psi / minute. The total treatment length was 97 minutes. Post-Treatment Vital Signs were: Time Vitals Taken: 14:09, Blood Pressure: 100/60 mmHg, Pulse: 78 bpm, Respiratory Rate: 18 breaths/min, Temperature: 98.4 °F, Capillary Blood Glucose: 174 mg/dl. Patient reports a pain level of 0. No adverse events were encountered.

Treatment Notes: Pt arrived to clinic in stable condition. Pretreatment vital signs were checked and charted WNL. Pt's descent was without issue and pt rested comfortably at treatment pressure. Pt needed to shorten today's treatment due to transportation issues. Pt's decompression was uneventful. Post treatment vital signs were checked and charted WNL and Pt was released from clinic in stable condition. M.Wallace, CHT.

Additional Information

Physician was readily available during the entire treatment.: Yes
Is Patient 30 day subsequent History and Physical due?: No

Plan
